

M · MONITOR

what's actually in the way

An encounter with the difference between real obstacles and invented ones.

🕒 10 MINUTES

THE MESS

1. Write down what you're stuck on. Then list every reason you can't move forward yet.
2. Go through the list. For each reason, ask: is this real, or is it a condition I made up? Mark each one honestly.
3. Pick the one real constraint. Set the rest aside for now.

Notice: which reasons feel the most solid -- and why.

NO OUTCOME REQUIRED.
