

S · SUPPORT

design for your worst day

An encounter with the distance between the support you built and the support you are actually using.

🕒 10 MINUTES

THE MESS

1. List the routines or habits you have set up to support yourself.
2. Mark honestly which ones you used this week.
3. Look at the one with the biggest gap. Ask: was this designed for my best day or my worst?

Notice: whether you feel defensive, relieved, or both.

NO OUTCOME REQUIRED.
