

S · SUPPORT

learning over optimizing

An encounter with whether your support system is designed to produce optimal outcomes or to help you learn and adapt.

🕒 10 MINUTES

THE MESS

1. Describe one support structure in your life — a habit, a system, a person you rely on regularly.
2. Ask honestly: is this designed to produce a specific outcome, or to help you stay curious and adapt when things change?
3. Name one kind of surprise or failure this support system has no room for.

Notice: whether your support system can learn, or only perform.

NO OUTCOME REQUIRED.
